

WANTED!

(preferably dead)

Fox tissue samples
for DNA analysis

The Fox DNA Project

We are investigating the population structure of foxes in Australia. The information gathered will improve the effectiveness of control. We would greatly appreciate your help to obtain tissue samples. These can be from roadkill, shot or trapped foxes. We can supply all the equipment and information required to take samples and preserve them and also pay for postage.

If you can assist, please call 1800 633 097, or ofb@cyllene.uwa.edu.au, or send samples to Oliver Berry, School of Animal Biology (M092), The University of WA, Crawley, WA, 6009.

Further information is available at WWW.foxDNA.animals.uwa.edu.au

All samples greatly appreciated!
